## OV Truss

OV40 Triangular

The OV range represents an innovative engineering solution to a common size of truss for the entertainment, event and presentation industry.

Designed to the latest Eurocodes, combines high comparative load capacities, low self-weight, and comes at a competitive price. All this whilst analysing the most common slinging / support methods on the truss has determined an 'engineered' product that can utilise the most modern manufacturing techniques.

The OV range is a series of square and triangular truss systems using conical connectors for a quick fixing method. Brace patterns are specifically designed to withstand the loads and forces implied by all common slinging and support methods. The extrusions used in the construction of the trusses are bespoke to Total Solutions Group and have been rigorously designed to enhance the structural effectiveness of the trusses and also to speed up manufacturing.

## Cantilever－Apex Down

Span（metres）

| Cantilever Span |  | 3 |
| :--- | :--- | :---: |
| UDL | kg | 480 |
| DEFL | $\mathbf{m m}$ | 10.2 |
| EPL | $\mathbf{k g}$ | 240 |
| DEFL | $\mathbf{m m}$ | 12 |
| CPL | $\mathbf{k g}$ | 470 |
| DEFL | $\mathbf{m m}$ | 8.2 |

Point Load （Central）

## OV Truss <br> OV40 Triangular

- All loads are given in kilograms and are total safe working loads (unfactored) at node points of a chord members only.
- Allowance has been made for self-weight of the truss
- Allowance has been made for frequent use factor of $85 \%$
- The payload on a truss has been calculated as a permanent action. Should it be necessary to consider the payload as a variable action, the tabulated figures should be reduced to $90 \%$ of the given values
- No allowance for dynamic loading has been made
- Capacity has been calculated in accordance with BS EN 1999 - Design of Aluminium Structures
- All loads applied are symmetrical between bottom 2 chords considering apex on top.
- All loads applied at the bottom chord considering apex downward
- All deflections stated are theoretical deflections which do not account for any connection slippage. As such the values stated in these tables will be less than the actual deflection of the truss.
- Care must be taken regarding the support condition of the truss. Figures 1 and 2 show the acceptable supporting conditions and figures 3 and 4 show the support condition that should not be used.

Figure 1: Orientation of the truss supported of top chords

Figure 3: Not allowed orientation of the truss supported of bottom chords

Figure 2: Orientation of the truss supported of bottom chords

Figure 4: Not allowed orientation of the truss supported of top chords

Item Codes, Weights and Dimensions

| OV40-025 | 'OV' Truss, 40 cm Tri, 0.25 Mtt section | $250 \mathrm{~mm} \times 400 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 2.6 kg |
| :---: | :---: | :---: | :---: |
| OV40-050 | 'OV' Truss, 40 cm Tri, 0.5 Mt section | $500 \mathrm{~mm} \times 400 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 3.5 kg |
| OV40-100 | 'OV' Truss, 40cm Tri, 1.0Mt section | $1000 \mathrm{~mm} \times 400 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 6.0 kg |
| OV40-200 | 'OV' Truss, 40cm Tri, 2.0Mt section | $2000 \mathrm{~mm} \times 400 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 11.2 kg |
| OV40-300 | 'OV' Truss, 40cm Tri, 3.0Mt section | $3000 \mathrm{~mm} \times 400 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 16.3 kg |
| OV40-400 | 'OV' Truss, 40cm Tri, 4.0Mt section | $4000 \mathrm{~mm} \times 400 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 21.3 kg |
| 0V40-90 | 'OV' Truss, 40cm Tri, 90 deg corner | $500 \mathrm{~mm} \times 500 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 5.8 kg |
| 0V40-3W | 'OV' Truss, 40cm Tri, 3way corner | $600 \mathrm{~mm} \times 500 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 6.9 kg |
| OV40-4W | 'OV' Truss, 40cm Tri, 4way corner | $600 \mathrm{~mm} \times 600 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 8kg |
| OV40-GPC | 'OV' Truss, 40cm Tri, Goal Post corner | $500 \mathrm{~mm} \times 500 \mathrm{~mm} \times 353 \mathrm{~mm}$ | 5.7 kg |
| OV30-FC100 | 'OV' Truss, Female bolt-on Connector - 100mm | $100 \mathrm{~mm} \times 48 \mathrm{~mm} \times 48 \mathrm{~mm}$ | 0.4 kg |
| OV30-MC100 | 'OV' Truss, Male bolt-on Connector - 100mm | $100 \mathrm{~mm} \times 48 \mathrm{~mm} \times 48 \mathrm{~mm}$ | 0.6kg |
| OV40-BP | 'OV' Truss, 40cm, Ali Base plate, 50cm Squ - No conns | $600 \mathrm{~mm} \times 600 \mathrm{~mm} \times 8 \mathrm{~mm}$ | 5 kg |
| OV40-TPB | 'OV' Truss, 40cm, Truss Pickup Beam - 1000Kgs | $422 \mathrm{~mm} \times 170 \mathrm{~mm} \times 65 \mathrm{~mm}$ | 5.2 kg |

## Design Specification

Manufactured in accordance with
BS EN 1090-3:2008 : Technical Requirements for aluminium structures
EN ISO 9001:2015 : Quality management systems
BS EN 1999 Pt 1-1 : Design of Aluminium Structures, General structural rules
EN17115: Entertainment Technology : Specifications for design, manufacture of aluminium
and steel trusses and towers
